PET ADOPTION IN AUSTRALIA

Who Finds a Home?

Exploring adoption outcomes for cats and dogs across Australia

① Where are pets being adopted?

1.1 Dog adoption rate by state (Choropleth map)

1.2 Adoption volume by state (Proportional Symbol map)

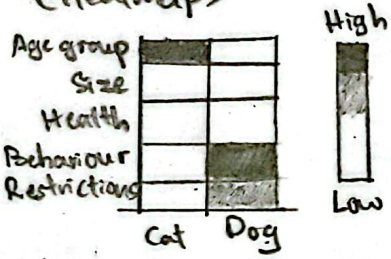

1.3 Cat and dog adoption success (Tile-grid map)

Takeaway: What the maps reveal
- Key insights about geographic differences
- States with higher/lower adoption rate

② Which pets find homes most easily?

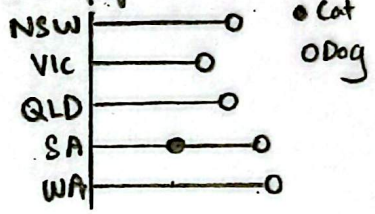

2.1 Adoption rate by characteristics (Heatmap)

2.2 Adoption rate by state (Dumbbell Chart)

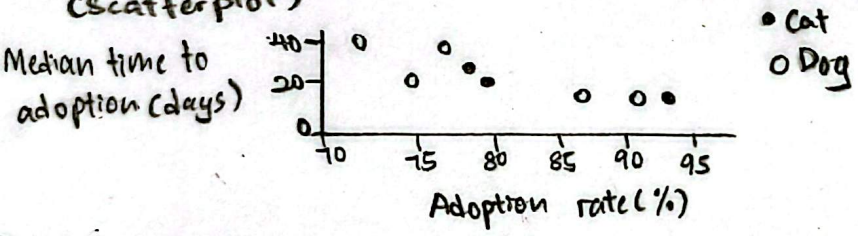

2.3 Median time to adoption by state (Lollipop chart)

Takeaway:
Adoption success is only part of the story
- Cats vs dogs comparison
- Waiting time differences across states

③ What makes adoption harder?

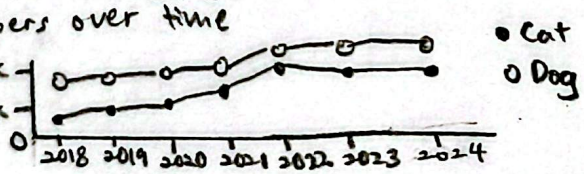

3.1 Adoption rate vs. median time to adoption (Scatterplot)

Takeaway: What makes adoption harder?
- Identify pet groups that are more difficult to place
- Relationship between adoption rate and waiting time
- Key factors (age, size, etc)

④ How is adoption changing?

4.1 Adoption numbers over time (Line chart)

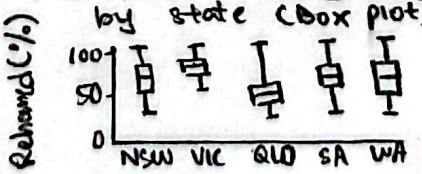

Takeaway: Trends over time
- How adoption numbers have changed
- Comparison between cats and dogs
- Identify overall trends and notable changes

⑤ What happens to animals in RSPCA care?

5.1 RSPCA outcomes by state (Normalised stacked bar chart)

5.2 RSPCA rehoming outcomes by state (Box plot)

Takeaway: RSPCA outcomes
- Compare rehoming, euthanasia and other outcomes across states
- Understand variation in rehoming rates

⑥ How do adoption profiles differ across Australia?

6.1 Adoption profiles by state (Parallel coordinates chart)

Takeaway: state profiles
- Compare multiple factors across states
- See trade-offs between adoption rate and speed
